Senior Product Manager | Data and AI Platforms | 0 to 1 Launches and Enterprise Scale

Product manager with a computer science degree and 5+ years across data engineering and product management. Owns platform strategy at PepsiCo for the data and AI layer that data science, engineering, and every global market build on. Shipped T-Mobile's first SMB sales platform from 0 to 1. Builds with frontier models directly: an MCP server and an agentic scoring pipeline that run in production every day.

EXPERIENCE

PepsiCo

Remote, USA

Senior Data Product Manager

Mar 2025 to Present

Data Product Manager

Jan 2023 to Mar 2025

- Grew adoption 50% from MVP on an ML product now used across 18+ business segments, holding 93% model accuracy.
- Cut planning and decision time for global market teams 60% by launching data products on a shared data lake.
- Secured \$3M+ in annual platform funding by tying each investment to a measured outcome in quarterly leadership reviews.
- Cut onboarding time for new data sources 40% by replacing one-off requests with a self-serve intake workflow.
- Halved dashboard query times by building the common data lake that became PepsiCo's single source of truth.
- Replaced weeks of manual leadership reporting with an AI-assisted pipeline that rebuilds itself on every data refresh.
- Own the platform roadmap and the governance model (quality, taxonomy, lineage, classification) other teams build on.

T-Mobile

Dallas, TX

Technical Product Manager (Contract)

Mar 2022 to Jan 2023

- Drove \$5M+ in transaction volume in month one at 90% CSAT by building T-Mobile's first SMB sales platform from 0 to 1.
- Cut time to market for new launches 10% by feeding vertical PMs the decision data they needed across departments.
- Ran 30+ user interviews and wrote the epics and stories that aligned engineering, sales, and business stakeholders on scope.

Tata Consultancy Services

Frisco, TX

Software Engineer, Cloud Security

Aug 2021 to Feb 2022

- Cut server response time 50% by rebuilding a legacy monolith as microservices on Docker, Kubernetes, and AWS.
- Held client systems at 99.9% uptime by owning cloud security setups, patching, backups, and network config.

AI PRODUCT BUILDS

- Built and deployed an MCP server plus six production systems with Claude Code, all in daily personal use.
- Designed a two-stage LLM pipeline where cheap batched triage gates full scoring, cutting cost per run roughly 100x.
- Wrote the scoring rubric, then caught its real failures: inflated scores, truncated verdicts, invented premises.

SKILLS

Product Strategy and Roadmaps, 0 to 1 Launches, Platform and Data Products, User Research and Discovery, Metric-Driven Validation, Executive and Stakeholder Alignment, Agile and SAFe, LLM and Agent Product Design, Model Evaluation, Data Governance, SQL, Python, Databricks, Azure, AWS, Kubernetes
